

NINFA

BOAT TYPE: Kayaks

INTRO:

NINFA is a medium-size kayak, easy to use also for beginners. Versatility is its main characteristic: ideal for excursions in calm waters on the sea as well as in moderately difficult rivers.

DESCRIPTION:

NINFA is the name of a kayak which used to be built in fiberglass. It is quite unusual nowadays to find standardized production of canoes similar to the NINFA. However, according to us, this type of model still has its appeal, especially for those who wish to have a nice looking kayak, easy to use and which could be a good introduction to the pleasures of paddling. Nearly all its features are middle-course. Its 64 cm beam is abundant but not excessive and, together with its flat-bottom, affords good stability. Versatility may be its main characteristic: ideal for excursions in calm waters on the sea and in moderately difficult rivers. In this last case the bottom will have to be reinforced with fiberglass to protect against rocks. It is short enough to be easily car-topped. The plans are available also for the strip planking construction.

DESIGN: Paolo Lodigiani & Matteo Costa

LOA: 4,30 m

BOA: 0,64 m

WEIGHT: 15 kg

CONSTRUCTION: plywood or strip-planking

PRICE complete plans: € 40
