

## TRICKY FIVE

**BOAT TYPE:** Multihull

**INTRO:**

TRICKY FIVE has been conceived for a precise scope: to realize a boat which in relation to its size would maximize the ratio between speed and cost.

**DESCRIPTION:**

TRICKY FIVE has been conceived for a precise scope: to realize a boat which in relation to its size would maximize the ratio between speed and cost. This means that for a determined cost for materials and hours of construction required, it would be the fastest possible. The boat is not too wide, which makes it easier to manoeuvre and light. The sail area is quite large, but rather than a Marconi rigging, we have chosen a gaff rig (to be more exact, a way between the gaff rig and the gunter). This helps to keep the centre of sails low and, above all, is much more economical to build, as the spars may be easily realised in aluminium or wood. As the main sail does not have roach, there is no need of battens. For those who prefer more conventional solutions, we also offer a version with Marconi rigging, which is more expensive but undoubtedly more performing upwind. The construction is very simple.

**DESIGN:** Paolo Lodigiani & Matteo Costa

LOA: 5,00 m

BOA: 3,00 m

WEIGHT: 137 kg

SAIL AREA: 14 sqm

CONSTRUCTION: plywood

**PRICE complete plans:** € 105
