

## VILA 620

**BOAT TYPE:** Fishing Powerboat

### **INTRO:**

VILA 620 is the intermediate model of the VILA family of three small planing motor cruisers/fisherman designed for amateur boat builders.

### **DESCRIPTION:**

VILA is a family of three small planing fishermen, whose name is explained in the description of VILA 570. VILA 620, the intermediate model, has been the most successful one, as its dimension allows planing (if not overloaded) even with a 40 HP motor (which in Italy does not require any licence) and offers more space than the smallest one, giving the possibility of a double berth under the deck. As the other VILAS it is very suitable to be used as a fisherman boat. The hull has an accentuated V shape at the bow, so as to allow it to pass smoothly over the wave but the deadrise at the stern is moderate to favour planing. It can be used either in internal waters or at sea. The construction, in stitch and glue, is very simple.

**DESIGN:** Paolo Lodigiani & Matteo Costa

LOA: 6,20 m

BOA: 2,50 m

WEIGHT: 750 kg

ENGINE: 40 HP

CONSTRUCTION: plywood

**PRICE complete plans:** € 200
