

## VILA 650

**BOAT TYPE:** Fishing Powerboat

**INTRO:**

VILA 650 is the biggest of the VILA family of three small planning cruisers.

**DESCRIPTION:**

VILA is a family of three small planning fishermen, whose name is explained in the description of VILA 570. The main advantage of the VILA 620 is that the double berth under the deck has some privacy as there is a small cabin. VILA 620 is very suited to fishing, with some variants in deck layout or in the cockpit, which the constructor may carry out according to the fishing technique. The suggested engine is an outboard from 40 to 60 HP in order to plane easily. The hull has an accentuated V shape at the bow, so as to allow it to pass smoothly over the wave but the deadrise at the stern is moderate. The construction, in stitch and glue, is very simple.

**DESIGN:** Paolo Lodigiani & Matteo Costa

LOA: 6,50 m

BOA: 2,50 m

WEIGHT: 795 kg

ENGINE: 40-60 HP

CONSTRUCTION: plywood

**PRICE complete plans:** € 220
